

Replace your unsightly metal filter grilles with our custom built wood filter grille assembly.

The grilles are available in 26 grille patterns.

Choose from oak, maple, or cherry face veneer.

The grilles are shipped sanded, ready to paint or stain.

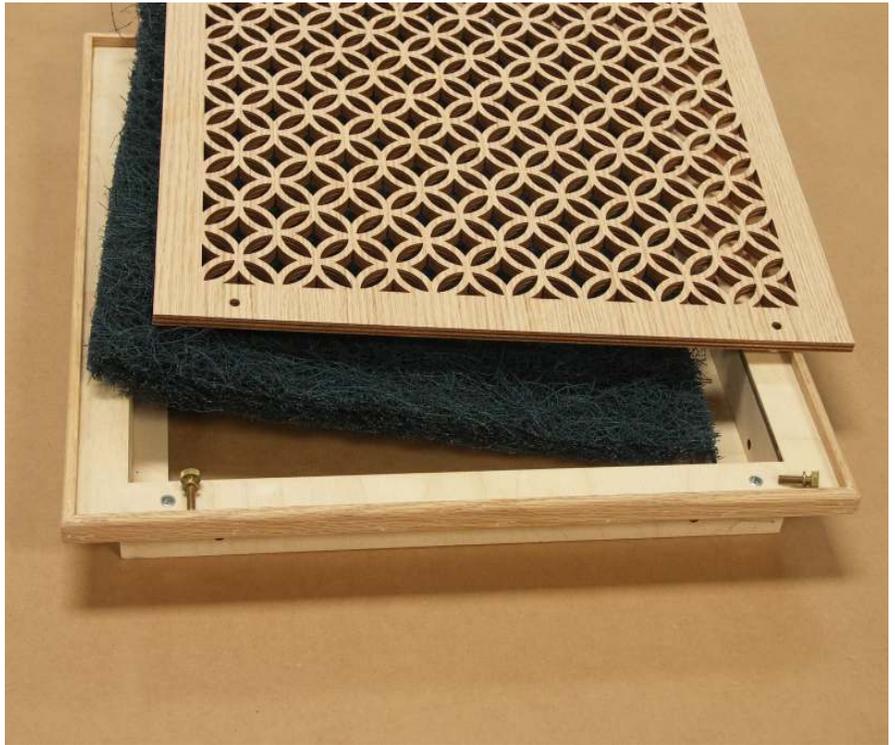

Remove your metal filter grille. Measure the wall opening.

We cut and build a wood filter grille assembly to fit your opening.

It is shipped to you sanded, ready to paint or stain.

We include a filter, or you can use your own.

Paint or stain and install the filter frame in the wall opening.

Filter frame installation close up.

Install the filter.

Attach the grille cover with the included brass thumb screws.
